Profile Summary

MERN Stack Developer with 4+ years of experience in ReactJS, NodeJS, ExpressJS, and MongoDB, skilled in building scalable, secure web applications. Proficient in RESTful APIs, Redux, and AWS S3, with proven ability to improve performance, scalability, and user engagement.

Skills & Others

- **Frontend:** HTML5, ReactJS, Redux, CSS3, ES6
- **Backend:** JavaScript, NodeJS, ExpressJS, TypeScript, Microservices
- **Database/Cloud:** MongoDB, AWS-S3
- **Version Control:** Git, GitHub, Bitbucket
- **Tools/AI:** Jira, Postman, VS Code, ChatGPT, Copilot, Loveable AI

EXPERIENCE

Software Developer at CIS

June 2022 - June 2025

MERN Stack Developer

Indore, Madhya Pradesh, India

- Engineered intuitive and responsive user interfaces with React.js and Redux, resulting in a **40%** reduction in page load times and a **25%** increase in overall user engagement metrics.
- Designed and implemented **RESTful APIs** with database optimization techniques like **aggregation**, boosting **performance, scalability, and load times**.
- Gathered requirements effectively, translating **100+ business needs** into actionable tasks, reducing feature delivery turnaround by **20%**.

Associate Software Developer at Systango

April 2021 - June 2022

Software Developer

Indore, M.P.

- Gained hands-on experience in **analysis, debugging, and development** of scalable web applications, reducing average bug resolution time by **15%**.
- Explored and learned **5+ new tools and technologies** under the guidance of senior developers, boosting project delivery efficiency.
- Collaborated on creating optimized versions of **10+ sample tasks**, ensuring a **30% improvement in code maintainability**.
- Successfully written and executed **50+ unit test cases**, maintaining **95%+ code coverage** across critical modules.

PROJECTS

Car Marketplace 2.0 — ReactJS, NodeJS, ExpressJS, MongoDB, Tailwind CSS

Apr 2024 – Jun 2025

- Engineered advanced **real-time filtering** (brand, model, price range, fuel type, body style) that improved user search efficiency and engagement by **30%**.
- Developed detailed **car profile pages** integrating backend APIs for **specifications, pricing, availability, and financing options**.
- Built **Trade-In and Test Drive forms** with **Formik** and **Yup**, reducing input errors by **40%**.

LoveMedia — ReactJS, NodeJS, ExpressJS, MongoDB, HTML, CSS

Jun 2022 – Mar 2024

- Engineered **Stripe payment gateway** integration and REST APIs, slashing digital content transaction failure rates by **15%** and expanding user access to premium features via subscriptions.
- Developed **category-based search and filtering** with optimized frontend rendering and full-text queries, improving discoverability by **35%**.
- Built **Mailchimp-integrated email workflows**, boosting subscriber conversion by **20%**.
- Integrated **Mixpanel analytics** across frontend and backend for real-time engagement insights, driving data-informed improvements.

EDUCATION

DAVV, International Institute of Professional Studies, Indore

2016 – 2021

M.Tech - Information Technology - CGPA: 8.5

Indore, Madhya Pradesh
