Summary

Creative and detail-oriented MERN stack Developer with over 3+ years of experience building responsive, scalable, and user-centric web applications using JavaScript, React Js, Express, Node js, Redux, and HTML5 using them focus on performance, accessibility, and cross-browser compatibility. Proven ability to collaborate with design teams to deliver seamless user experiences. Passionate about staying updated with the latest technologies and industry trends to craft modern, maintainable interfaces that drive user engagement and business growth.

SKILLS & OTHERS

- **Front End Development** -: HTML5 | React Js | Redux | CSS3
- **Backend Development** - Javascript | Node JS | Express JS | TypeScript
- **Databases** - MongoDB
- **Cloud Technologies** - AWS-S3
- **Version Control System** - Git | Github | Bitbucket
- **Tools & IDE** - Jira | Postman | Visual Studio Code | Sublime
- **Certifications** :
 - Earned LinkedIn Skill Badges in Problem Solving using Javascript - **Hackerrank**
 - The Complete Web Development Bootcamp - **Udemy**

PROFESSIONAL EXPERIENCE

Cyber Infrastructure, Indore, India
Software Developer

June 2022- June 2025

- Built responsive and interactive user interfaces with **React.js**, utilizing **hooks**, **context API** and **Redux** for state management.
- Design and implement various **RESTful APIs** with database optimization techniques, boosting performance, scalability and load times.
- Gathered requirements effectively, translating business needs into actionable tasks.

Systango, Indore, India
Associate Software Developer

April 2021- June-2022

- Collaborated with clients and development teams to discuss project aims, ensuring alignment on objectives and deliverables for web applications.
- Participated in code reviews, peer programming sessions, and continuous improvement of development workflows.
- Documented technical specifications, API contracts, and deployment guides for team-wide collaboration and handoffs.
- Performed unit testing with **Jest** and integration testing using **Postman** to ensure code quality, functionality, and reliability.

PROJECTS

Car MarketPlace 2.0

April 2024 - June 2025

- Implemented advanced filtering functionality (e.g., brand, model, price range, fuel type, body style) to dynamically suggest relevant car **listings** in real time.
- Built car **details pages** displaying specifications, pricing, availability, and financing options, fetched from backend **APIs**.
- Integrated multiple car **financing calculators** (Bank11, Renault Bank, BMW Bank, etc.) to provide users with custom loan estimations.
- Developed Trade-In and Test Drive forms using **Formik** for form state management and Yup for schema-based validation.

- Maintained a clean codebase with reusable components and followed best practices in **React hooks** and component composition.
- **Technology Used** : Javascript, Node JS , Express Js, MongoDB , React Js, HTML, Tailwind CSS.

CMS Admin Portal

June 2022- March 2024

- Developed a fully functional Admin Panel using React JS for managing content, domains, users, and **multilingual** support.
- Implemented Content Management System (CMS) capabilities to create, edit, publish, and archive dynamic content with rich-text editing and media upload support.
- Built a robust User Management module allowing admins to view, search, filter, and manage user accounts, roles, permissions, and activity logs
- Designed role based access control **RBAC**.
- Designed and integrated a Domain Management system to add, update, and assign multiple domains to specific distributors or environments.
- Developed Translation Management tools to handle multilingual content, supporting **i18n** and dynamic language switching across the platform.
- **Technology Used** : Javascript, Node JS, Express Js, MongoDB , React Js, HTML, CSS.

LoveMedia

June 2022- March 2024

- Integrated the **stripe** payment gateway, and third party API for a digital media content platform.
- Implemented dynamic content rendering based on **user geolocation**, utilizing **IP-based** detection and **personalized** user experiences.
- Developed category-based **filtering** and **search** functionality for discovering media content using **full-text search** in database and **optimized** frontend filtering.
- Built form-based **email capture** flows integrated with **Mailchimp API**, storing user data for newsletter and marketing campaigns.
- Structured content into **free** and **paid** sections, managing content access control and preview logic on both frontend and backend. Integrated **Mixpanel** analytics from backend as well as from frontend.
- **Technology Used** : Javascript, Node JS, Express Js, MongoDB , React Js, HTML, CSS.

EDUCATION

International Institute of Professional Studies, DAVV, Indore,India
Master of Technology (Integrated), Information Technology

2016-2021

LANGUAGES

• Hindi • English
